DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 8-15, 18, 20, 23, 26-31, and 34-36, drawn to a miniature microscope objective comprising at least three lenses, classified in class 359, subclass 661.
 - II. Claims 3-7, 16, 17, 19, 21, 22, 24, 25, 32, 33, and 37-52, drawn to a miniature microscope objective comprising at least four lenses, classified in class 359, subclass 660.
2. No claim links inventions I and II. Some subcombination claims include the limitations recited in some combination claims, except for the limitation that creates the combination (for example, claims 2 and 3 and claims 31 and 32). However, subcombination claims are not generic to the combination (MPEP § 806.04(c), MPEP § 806.04(d), first paragraph, and MPEP § 809.03).
3. The inventions are distinct, each from the other because:
4. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the broadest combination claims (for example, claims 3 and 32) do not recite the particulars recited in subcombination claims 8-15, 18, 20, 23, 26-30, and 34-36. The

Art Unit: 2873

subcombination has separate utility such as in microscopes of the type disclosed in the references classified in class 359, subclass 661, and in a microscope array of the type disclosed in parent application 10/241,811 on pages 15-18 of the specification with regard to Figure 2 and Table 1 in the parent.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Because of the complexity of the current restriction requirement, no telephone call was made to request an oral election.
